**Grandio® blocs · Grandio® disc**

**Nano-ceramic hybrid CAD / CAM material**

- For the fabrication of definitive crowns, inlays, onlays, veneers and implant-supported crowns
- Highest filler content (86 % w/w)
- Resembles natural teeth perfectly
- Excellent physical values for flexural strength and abrasion
- No firing required
- Can be processed using any conventional milling unit
- Can be polished and repaired optimally
- Ideal for milling even in cases with thin margins
- Based on the nano-hybrid technology

---

REF 6000
SolFlex 170 · 170 SMP

Additive manufacturing for digital dentistry

- DLP-Technology with a long-lasting UV-LED light source enables printing of clear transparent items such as splints
- Patented Flex-Vat technology – increasing printing speed while minimizing support structures, saving time and material
- High vat volume allows production over night
- Processing of widely-used STL format

SMP

- Maximized building speed with high process reliability due to SMP technology
- Increase in printing speed by up to 40 % with SMP technology

SolFlex 170 3D printer REF 9100
SolFlex 170 SMP – 3D printer (incl. sensor technology) REF 9101

V-Print

Material for 3D printing

- V-Print model beige for the entire spectrum of models in dentistry
- V-Print SG for the generative production of dental surgical guides
- V-Print splint for splints used in treatments, auxiliary parts and functional parts for use in dental diagnostics, as well as bleaching trays (home bleaching)

V-Print model Bottle 1000 g beige REF 6042
V-Print SG Bottle 1000 g clear REF 6043
V-Print splint Bottle 1000 g clear REF 6044

YOUR ORDER

Please contact your dental depot or your VOCO dental consultant to order the VOCO Highlights presented here. Offers are only valid at participating retail partners. Special prices offered by your depot are always taken into consideration.
