Highlight 1: VisCalor® bulk

Thermoviscous bulk fill composite

- Heating of the material makes it flowable for the application and then sculptable immediately afterwards (thermoviscous technology)
- Optimal flowing to margins and undercut regions – minimises risk of marginal gaps
- 4 mm bulk fill without covering layers
- Bubble-free application
- One universal and three aesthetic shades
- Slender cannula – ideal for hard-to-reach areas

Highlight 2: Admira® Fusion

Universal nano-hybrid ORMOCER® restorative material
- The worldwide first purely ceramic-based restorative material
- By far the lowest polymerisation shrinkage and particularly low level of shrinkage stress in comparison to all conventional restorative composites
- Inert, so excellent biocompatible and extremely resistant to discolouration
- Excellent handling, simple high-lustre polishing procedure coupled with high surface hardness guarantee first-class long-term results
- Compatible with all conventional bonding agents

Highlight 3: Grandio®SO Light Flow

Low-viscosity nano-hybrid composite for delicate applications

- **Low viscosity** – outstanding flow properties and therefore optimally suitable for hard-to-reach areas and small cavities
- **Extra-fine cannula** – for precise and pinpoint application, dosage without excess residues
- **High performance** – excellent physical properties, e.g. filler content of 76% by weight
- **High aesthetics** – 8 shades for individualised applications
- **Excellent handling** – NDT®-syringe – non-drip, compatible with all light-curing bonding materials

Highlight 7: V-Posil

**Precision impression material, VPS**
- Highly hydrophilic A-silicone for maximum precision
- Long working time combined with a short intraoral setting time
- Exceptional toughness and recovery after deformation ensure safety during or after removal
- Good hydrophilicity, even after setting, renders pouring and thus the prosthetic restoration perfect
