

VOCO HIGHLIGHTS

Valid from 01.04. - 30.09.2018

Highlight 1: Admira® Fusion

Universal nano-hybrid ORMOCER® restorative material

- The worldwide first purely ceramic-based restorative material
- By far the lowest polymerisation shrinkage (1.25 % by volume) and particularly low level of shrinkage stress in comparison to all conventional restorative composites
- Inert, so excellent biocompatible and extremely resistant to discolouration
- Excellent handling, simple high-lustre polishing procedure coupled with high surface hardness guarantee first-class long-term results
- Compatible with all conventional bonding agents

Set + bond
syringe 5 × 3 g
(A2, A3, GA3.25, A3.5,
Admira Fusion x-tra),
shade guide + Futurabond U
SingleDose 20 pcs.

*If you order four packages via a VOCO dental consultant, you will receive another package for free. The free goods will be sent to you by VOCO.

Highlight 2: Admira® Fusion Flow

Flowable light-curing nano-hybrid ORMOCER® restorative material

- Extremely low polymerisation shrinkage (2.75 % by volume)
- Inert, so excellent biocompatible and extremely resistant to discolouration
- "Flow-on-demand", i. e. either flowable or stable on demand

Set syringe 5 × 2 g
(A1, A2, A3, A3.5, WO),
shade guide, accessories

Highlight 5: Futurabond® U

Dual-curing universal adhesive

- One bond for all cases – makes all other adhesives in the practice redundant
- Self-etch, selective-etch or total-etch – free choice for the practitioner
- Outstanding versatility of application
- Moisture tolerant

Highlight 6: Celalux® 3

High-power LED curing-light

- High light output of approximately 1,300 mW/cm²
- Compact size, ergonomic design and light weight (70 g) – thus good handling
- Comfortably and easily usable charging station with integral radiometer and additional rechargeable battery
- Monitoring of polymerisation time by vibration (at the beginning, after 10 s and after 20 s)

LED curing-light (handpiece, battery charger, power cord with interchangeable mains adapters, 2 lithium polymer batteries, 8 mm light guide, rubber shield, operating instructions)

REF 9090

Highlight 7: V-Posil

Precision impression material, VPS

- Highly hydrophilic A-silicone for maximum precision
- Long working time combined with a short intraoral setting time
- Exceptional toughness and recovery after deformation ensure safety during or after removal
- Good hydrophilicity, even after setting, renders pouring and thus the prosthetic restoration perfect

New: now also available as a monophase material

Highlight 8: BrackFix®

Light-curing bracket bonding system

- Optimal consistency of the adhesive: stable positioning of the bracket on the surface of the tooth
- Provides secure adhesion for metal and ceramic brackets
- Light-curing: long working time
- Can be exposed to loads immediately after polymerisation
- Fluorescent: allows for quick and gentle elimination of adhesive residues after bracket removal

Highlight 9: Meron Plus QM

Resin reinforced glass ionomer luting cement

- High adhesion values compared with conventional glass ionomer luting cements
- Precise marginal fit
- Self-adhesive: secure and quick bonding
- Excess material can be removed without waiting thanks to optional short-time light polymerisation

QuickMix syringe 8.5 g,

Grandio® blocs · Grandio® disc

Nano-hybrid composite CAD / CAM materials

- For the fabrication of definitive crowns, inlays, onlays, veneers and implant-supported crowns
- Highest filler content (86 % w/w)
- Resembles natural teeth perfectly
- Excellent physical values for flexural strength and abrasion
- No firing required
- Can be processed using any conventional milling unit
- Can be polished and repaired optimally
- Ideal for milling even in cases with thin margins
- Based on the nano-hybrid technology

SolFlex 170 · 170 SMP

Additive manufacturing for digital dentistry

- DLP-Technology with a long-lasting UV-LED light source enables printing of clear transparent items such as splints
- Patented Flex-Vat technology – increasing printing speed while minimizing support structures, saving time and material
- High vat volume allows production over night
- Processing of widely-used STL format

SMP

- Maximized building speed with high process reliability due to SMP technology
- Increase in printing speed by up to 40 % with SMP technology
