Futurabond DC

Dual-Cured

- It is dual-cured and works with all light-, self- or dual-cured resins
- It works in a self-cured mode without any light
  - great for endo
- It takes only 35 sec. from start to finish
- It needs only one coat

Whatever generation you call Futurabond DC, it will replace all of your existing bonding systems.

Is this the first 8th Generation bond?
VOCO’s patented new Single Dose System eliminates the problem of solvent evaporation as known from other systems. This ensures reliable high bond strength each use.

- Virtually no post-operative sensitivity
- Over 30 MPa adhesion to dentin and enamel with LC composites and strong bond strength with DC and SC composites
- Fast and easy one-coat application (apply, dry and cure in 35 sec.)
- Reinforced with nano particles for permanent bond strength

REF 1164 pack 50-0.1ml SingleDose, accessories
REF 1165 pack 200-0.1ml SingleDose, accessories
REF 1163 set 4ml liquid 1, 4ml liquid 2, accessories
